## SPECIALISED SERVICE MENU

*"Serious skincare for people who  
are serious about their skin"*

## New, Fast, Zero Pain Hair Reduction

- No Pain
- No Pimples
- No Ingrown Hairs
- No more Shaving or Waxing
- Your Treated Hair Never Grows Back
- No Downtime

If you have not tried our IPL Laser Hair Removal, you are seriously missing out on looking great and enjoying permanent hair reduction hair removal. You may have heard about laser in the past and how painful it is! Well, not anymore. With our machine you can enjoy the benefits of being hair free and as an added bonus it's PAINLESS.

## Is my hair type suitable?

The FDA has stated that IPL laser is effective for permanent hair reduction. IPL Laser hair removal effectively eliminates most of your hair with colour and hair that is in an active growth stage. Due to the stages of growth you will need multiple treatments as all hair is not actively growing at any one given time.

The best results occur on hair that is brown or black combined with fair skin. Light blonde, red and other hair that is nearly colourless will not be heated enough by the IPL laser to destroy the follicle.

Most people are satisfied with their hair removal averaging around 4-8 treatments, however some people need more.

## How many treatments will I need?

It is important to remember that each individual's hair growth is effected by:

- Age
- Ethnicity
- Weight
- Metabolism
- Medication
- Hormones

These all have a direct effect on hair growth and can affect the IPL Laser hair removal process.

## Will I need any more treatments?

Eventually you will need to have a touch up treatment. This is due to new follicles being formed (see list for reasons why). In this case, when your hair growth returns to 40%, you will need to have another treatment.

For some people this takes years and for other people it can take 6 months. Again, it depends on your body's way of stimulating hair follicle development.

## Improve your skin at the same time

The IPL Laser has another trick up its sleeve! It also stimulates collagen and elastin production. This will give you smoother, softer skin and you no longer have to worry about that dreaded "fuzz-look" any longer.

## How to prepare for your IPL Laser Treatments

- Discontinue waxing, sugaring, threading or tweezing the area to be treated by the IPL Laser for 4 weeks prior to commencement of treatment. Waxing and tweezing removes hairs from the root which will make your treatment ineffective.
- You will need to ensure that the area to be treated is "hair-free", This means that you will need to shave or use depilatory cream in the area to be treated, **two days prior to your treatment**. We have found that you achieve better results when you have 1mm of hair protruding from the skin.

If you require us to shave the area for you, please let the salon know at the time of your appointment booking. An extra charge will apply for this service

**\$35.00**      **Body Areas**  
**\$ 5.00**      **Face Areas**

- Make sure you don't have tanned skin through sun exposure, tanning bed use or self tan 30 days prior to your treatment.
- Avoid exfoliating, micro-dermabrasion or peels one week prior to your treatment.
- Avoid wearing tight clothing to your treatment sessions.
- Keep the area clean and dry.
- Avoid use of bleaching creams, deodorants or perfumed products for 24-48 hours prior to commencement of treatment.
- Hydrate the body by drinking plenty of water.

**Please note** that hot and humid weather conditions can aggravate the skin in the period immediately before your treatment.

## PRICES SHOWN ARE FOR EACH APPOINTMENT BOOKING

### Hair Removal

Under Arms	\$ 99.00
Bikini Line	\$ 99.00

### After Care Advice

- Protect the skin from sun exposure with suitable clothing and use of SPF 30+ Sun block.
- Keep the area clean and dry.
- Leave any skin responses alone as these are temporary and will subside.
- Don't pick or scratch the treated area.
- Immediately following post-hair reduction treatments, effective skin cooling of the epidermis can be helpful. The use of ice or cooling gel packs can improve comfort and reduce post-treatment redness.
- Follow home care as advised by your skin care professional.
